Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Scottsdale, AZ 85260

"NEW YORK - Comcast Corp. actively interferes with attempts by some of its high-speed Internet subscribers to share files online, a move that runs counter to the tradition of treating all types of Net traffic equally. The interference, which The Associated Press confirmed through nationwide tests, is the most drastic example yet of data discrimination by a U.S. Internet service provider. It involves company computers masquerading as those of its users." Comcast's blocking of peer-to-peer communications is the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Thank You Linda Baugh

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The dominance of corporate media is literally shutting out democratic debate. A prime example was NBC's arbitrary decision to uninvite Rep. Dennis Kucinich to participate in MSNBC's presidential debate just a few days after having already formally extending him an invitation. Trying to correct this outrage, a state judge ruled that six-term congressman Dennis Kucinich must be allowed to participate -- but the state's supreme court overturned that decision. I don't subscribe to cable TV. Most debates have not been televised on the usual "free" TV stations. WHY NOT??? The FCC has given these stations free use of our public airwaves without even requiring a modicum of public service in return. I mightily resent the fact that the debates have not been telecast on regular TV stations. Now we are having to fight for net neutrality. The Fourth Estate was given special status by our founders because they realized that a free press was essential to the maintenance of democracy. We can't have one without the other. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

It's hard enough for some of us to get connected but to think someone like a communications giant like Comcast being allowed to fiddle with our connection or to delay the speed or divert it through unnecessary stuff is outrageous. It must not happen. Keep the internet neutral! Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Open access to all forms of free speech, through all delivery conduits available for information dissemination is vital and key to a health democracy. Anything less is corporate controlled media fascism! Comcast's gross and perverse suppression of the right of free speech via internet gate keeping deserves to have their FCC license yanked permanently. This would serve as the perfect example for all other would be corporate fascists who would dare act to suppress free speech through Internet gate keeping. Keep the Net Neutral! Anything less is unacceptable! The Net is one of the last great technological innovations that the U.S. has left to help shore up its failing economy (which was also brought to us by corporate fascism).

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Robert Fruchtmann
6620 E Paseo San Andres
Tucson, AZ 85710

Comcast's outright despicable blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and break down the barriers to free information, allowing Americans full access to the treasure trove of information available to the rest of the world. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Comcast has not only lied to the public and the FCC about its use of technology to block technology that is vital to many people, but the company has also crafted false support for those same blocking techniques in order to dictate the course of discussion and sway the FCC in favor of allowing Comcast to pull the rug out from underneath millions of hard-working Americans. There is no question that immediate action must be taken by the FCC to clamp down on such regressive information access filters.

Sedona, AZ 86351

Why? Why I ask myself. Why do I take the time to write my concerns and send it to the FCC? Why do I waste my time? Why do I waste my time when the ego-filled young snot-of-a-man - who was politically appointed by the corrupt Bush people and is bought and paid for by ComCast and others of their ilk - has already made up his mind to rule in favor of the Comcast company and the public, the American People, be DAMNED! WHY? Because I, like so many 10's of thousand of Americans, care enough to try to make our 'PUBLIC SERVANTS' realize they are to represent US - the USA - when they make a decision. DO YOU CARE? Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Comcast's attempt to block peer-to-peer communications is a disservice to those who are homebound, old, unable to hear, who find communication through the internet a useful way to keep in touch with the world outside their limited world. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. It is imperative that the FCC follow its original intent and keep the internet open to the public, not accede to the wishes of large corporate blandishments, and huge amounts of money put into these campaigns to divert the will of the people for their own

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I approve this message and add my own comments: My name is Mary K Hunt, I am 80 years old and am seeing the corporate media violate our constitutional freedoms in many ways. You must make an example of Comcast to send a message that the FCC will enforce the freedom of the internet so that other internet provider's will be warned against doing the same thing. This is the USA and those of us in the "greatest generation" are protecting our children and grandchildren against future violations of this sort.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I am a computer tutor and have had to explain to my clients that when their computer doesn't get the info for them, it's COMCAST blocking it. They not only block peer to peer, but often movies. If the client tries again at a non busy time, they then get the desired item. This is DISGUSTING. People are paying for a service that is restricting what they can do. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans

have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Tucson, AZ 85710

Comcast's record in the cable industry REEKS of back-door politics and dirty tricks to achieve its aims. Cable-TV prices are THROUGH the roof -- while service remains in the basement. DON'T LET THIS HAPPEN TO THE INTERNET. DO NOT LET TELECOMMUNICATION INTERESTS REMOVE THE ABILITY OF FREE AMERICANS citizens to lobby for the American PEOPLE -- and what benefits the COMMON GOOD. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. Tucson, AZ 85701

Comcast's shameless blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. My religious organization has been planning to use bittorrent to archive and distribute audio and video material, because it is an inexpensive and democratic way to do it - our members pay for the bandwidth that's used, and so we can maintain an online presence without paying exorbitant fees we can't afford. This anti-democratic blocking of bittorrent streams is the antithesis of what the Internet is about. We simply can't allow

corporate gatekeepers to smother these communications by discriminating against new technologies, secretly (or openly!) interfering with Internet traffic and stifling innovation.

Andrew Lenards
1535 E. Prince Rd.
Tucson, AZ 85719

Wow! Is Comcast as arrogant and filled with hubris as their actions blocking peer-to-peer communications makes them look? This is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The only way to deal with this is for the FCC to take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Hey - if one company thinks they can get away with it, this actions will begin happening more and more. Nip these activities while it's not rampant. A free market needs a neutral network - plain and simple. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast is trying to limit our freedom of speech. They should be put on warning that they could loose their business if they don't back off. I'm sure they pride themselves on getting big and rich "the American way," but their actions are decidely anti-American.

Braxton Norwood
1501 N Campbell Ave
Tucson, AZ 85724

SavetheInternet.com just caught Comcast Corp. stacking an FCC hearing with paid (and apparently sleepy) seat-fillers. The hearing was set up to investigate Comcast's recent blocking of the Internet. But Comcast packed the room so that the public couldn't get in to voice their support for Net Neutrality. SavetheInternet.com took pictures and recorded an interview that proves Comcast was taking seats from concerned citizens. This is unacceptable.

James Nowland

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Further, as we have seen in this latest presidential campaign, the internet serves to reach more Americans, especially the young adult, the intelligent, and the ambitious voters. It has also become invaluable to candidates who possess fewer financial resources thus providing a more level the playing field. To avoid further erosion of our Constitution, and further push our economic and political system toward predictable ruin should we continue to allow elitist approaches to "stretch" their advantage further than the latest administration has made fashionable, we, ALL OF THE PEOPLE, need neutrality and leaders who are not afraid to say so. Thank you for your time and attention. Sincerely, Julie M. Passarge

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Cox and AT&T have also admitted they were ready to employ similar software, choke, throttle network traffic. They all advertise and sell "unlimited" access. Cox in my region has begun to sell 'upgraded' services and access channels for an additional \$20/month -in addition to the \$50/month already charged. There is NO other high speed provider in the area and probably won't be. The telephone company is only interested in offering DSL to newer areas of the city and I'm in an older area. This also puts my home at an economic disadvantage. That's why the FCC needs to take swift action to prevent cable companies from discriminating. Most homes DO NOT have a choice of providers (Thank you, again). If not, other internet providers will quickly follow suit to cap services while still advertising 'unlimited' access. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Right now, if Cox decided to charge \$1,000 for basic cable, I would need to pay or go out of business - and probably both. Millions of other business' could easily be strangled by reducing their access to the single major economic boom in the 21st century - the internet.

Don't let the corporations ruin the internet,, the best thing about it is freedom; choice. Unlike TV, the internet allows a two-way dialogue, and to let an ISP censor your dialogue is unconstitutional. Please do not allow ISPs, Telecoms, or the government itself to bend the internet to its own demands, let it remain the great equalizing public forum it is shaping to be. Oh, and there are millions of legitimate peer-to-peer connections made daily, even if a small percentage of them break the law via copyright infringement, don't punish all the users of all P2P services! It would be like a CD store not selling rap music because it gets stolen more often, a convenience store not selling lighters or visine, or alcohol (or drugs) made illegal because some people abuse it. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. In short, there is no difference between Comcast and the Islamic censorship terrorists of Pakistan who shut down the whole of Youtube with their attempt at censorship. The difference between us and the terrorists is that we believe in freedom and democracy. Comcast is trying to undermine everything our Founding Fathers stood for, and our troops have fought and died to defend.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Upon learning that Comcast paid seat warmers to fill the room and block the public from the Harvard public hearing has strengthened my resolve never to become a customer of Comcast. The only language Comcast understands is monopoly and exclusion. That's how Comcast has come to be the sole provider of cable television in my area, manipulating the content, prices and policies. Comcast also has the only fast broadband internet in my area. Because of Comcast's abuse of its customer's access to online information, I have decided I won't succumb to temptation of faster internet, only to become entrapped in a spiral of increasing prices and limited access.

Is there nothing that is sacred any longer when it comes to our independence of "FREE" information. Why do we have to pay for it? It's been working fine for the past 20 years or more. Aren't the big corporations satisfied enough with collecting fees for the use of the internet currently? Do we, as consumers, have to keep shelling out to fatten the fat-cats even more? I say, get rid of any charges on the internet so that it's "TOTALLY FREE." No monthly fees etc.

Sun City West, AZ 85375

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. We can't allow corporate gatekeepers to smother communications by discriminating against new technologies, secretly interfering with Internet traffic, and stifling innovation. Penalize Comcast now and make the penalty substantial. Delaying action or giving Comcast a slap on the wrist for its insidious practices not only allows Comcast to continue to interrupt the freeflow of Internet information but lets all ISPs know that the FCC is afraid of fallout or isn't serious about regulation and fair play. Taxpayers need you to do your job.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

For independent artists, peer-to-peer offers an opportunity to find an audience. Even if the major records labels are not interested in this potential, there are a quarter-million acts which are. When Comcast blocks p2p traffic, they are interfering with our legitimate promotional efforts. If allowed to continue, this will have the same effect on independent artists as payola did to our ability to be played on the radio. The FCC allowed radio to be ruined. The musicians will not allow the same thing to happen to the Internet.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. As a small business owner, I know that the only defense I have against competition from large corporate competitors is equal access to customers via the internet. If this is lost, economic innovation and diversity, which is contributed by small businesses, will be lost. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information.
